Ashwin Balaji Arun Kumar

E-mail: arunkumar.ashwin@outlook.com **Phone:** +49 17665908289
LinkedIn: linkedin.com/in/ashwinbalaji-ar **Github:** github.com/ashwin-ar/
Location: Dortmund, Germany

Education

Fachhochschule Dortmund – University of Applied Sciences and Arts Dortmund, DE
Master of Engineering (M.Eng.) in Embedded Systems Engineering 10/2025 – Current
(Results pending for first semester)

Anna University Coimbatore, India
Bachelor of Engineering (B.E.) in Electrical and Electronics Engineering 08/2018 – 06/2022
GPA: 1.5 / 4.0 (German equivalent)

Skills

Languages & Tools: C, C++, Python, Assembly (Fundamentals), Matlab/Simulink, Git, SVN
Hardware: TI-C2000 (TMS320F), Renesas RL78, STM32 (F4 Series), ESP32, RP2040
Communication Protocols: I2C, UART, SPI, Modbus, RS485, HTTP, MQTT
Power Electronics: Variable Frequency Drives, AC/DC, DC/DC Converters, Solar/PV Systems, PID
Laboratory Tools: Multimeters, High frequency DSO, Frequency generator, PV simulators

Work Experience

Schneider Electric Mumbai, India
Deputy Manager – Firmware 08/2023 – 09/2025

- Spearheaded **3-20 HP VFD** firmware development in C, managing the full lifecycle on TI and RL78 MCUs.
- **Architected** a modular application layer, decoupling control logic from hardware using **HAL** for portability.
- Developed a high-efficiency (98%) **P&O MPPT** algorithm for DC solar pumping systems.
- Optimized **short-circuit protection** to **200ns** using Trip Zones, thereby **reducing field failures.**
- Integrated **static analysis** into a CI/CD pipeline, ensuring **10+** high-quality firmware releases.
- Replaced physical EEPROM with **flash-based EEPROM emulation**, significantly reducing unit **BOM cost**.

Graduate Engineer Trainee – Electromechanical 07/2022 – 08/2023

- Supported **6A – 100A RCBO** range lifecycle by handling Design changes and customer complaints.
- Reduced short-circuit **let through energy by 4%** through contact design optimization.(as per IEC 61009-1)
- Identified 30+ failure cases in DFMEA and **resolved 2 failures** with RPN>144.

Virtual Sapiens, Coimbatore, India - *Hardware Intern* 08/2020 – 01/2022

- Built a Telepresence bot using **Raspberry Pi for low-latency (<800ms)** HTTP video streaming and **AWS MQTT** for bot control.
- Developed a control algorithm for BLDC motors using STM32F4103.
- Implemented **I2C communication** between Raspberry Pi and STM32 for steer commands exchange.

Projects

i-Practace – Automatic Tennis ball throwing machine

- Designed **a custom PCB using Ki-Cad** to integrate a Dimmer circuit and an SMPS.
- Managed hardware selection for motors/sensors and led complete **POC** development delivering it for field testing.

Languages

German: A2 (Actively pursuing B1) **English:** C1
